Department of Biomedical Imaging  
University Malaya Medical Centre  
Kuala Lumpur

# Course s t r u c t u r e

The intensive course is designed to prepare the candidate who is going to sit for the MRCOG Part 1 Examination soon. It is a revision course and the candidates are expected to have done some reading before coming for the course. The whole syllabus cannot be covered given the short time available. However, the topics have been carefully chosen in order to cover the areas from which the bulk of the questions are being or have been asked or areas in which the candidate is likely to have problems e.g. statistics, applied pathology, fluid and electrolyte balance, radiological diagnosis, clinical scenarios, etc. An impressive array of Faculty members with a wide experience in post graduate training have been chosen to cover these topics. In addition there will be ample practice with single best answer (SBAs) questions on the topics lectured.

Please make the best of the Course and I wish you the best in your Examination.

**Professor Kulenthiran Arumugam**

## Programme

**REGISTRATION**

**Time : 0800 to 0830**

**Date: Tuesday, 3 February 2015**
