

Virtual Prenatal Genetics Short Course

13 September – 2 November
2021*

Online course

This skills based course is designed to give midwives and other health professionals working in a prenatal testing setting, the tools to help them to enable patients to access appropriate onwards referral. These include obtaining a family history, identify high risk family histories, approaches to genetic testing, consent taking and counselling skills associated with providing information and results.

* The course will take place on six half day sessions running between September and November 2021.
