Dear Esteemed Colleagues

While we will miss the excitement and warmth of personal exchanges in previous meetings, the COVID-19 pandemic brings about a whole new innovative dimension of virtual arena for conferences from 2020 and beyond. The inconvenience and threats of the pandemic have not deterred interactions and academic exchanges between professionals from different geographical landscapes. The thirst for continued healthcare advancements is reconciled with evolving seamless technological mechanisms to bridge these distant gaps.

Undeterred by these barriers and leveraging technology, it is with great pleasure that we invite you to attend the 2021 Singapore International Congress of Obstetrics and Gynaecology (SICOG). First organized by the Obstetrical & Gynaecological Society of Singapore (OGSS) in 2005, this 11th edition of SICOG will be held virtually for the first time in its history from 20th to 22nd August 2021.

SICOG has always successfully attracted crowds of delegates from Singapore and around the region as well as beyond. The themes for every congress focus on globally-evolving climates in the fields of Obstetrics and Gynaecology, as we strive to remain at the fore-front of academics and cutting-edge technological advances. This current one is no different.

Our theme for the 2021 congress is "Transforming Women's Health". An exhilarating and high impact scientific program with local and international experts in their respective subspecialties, including maternal fetal medicine, benign gynaecology, reproductive medicine, and gynaecological oncology has been specially and elaborately crafted to satisfy the voracious appetite of our delegates in achieving the highest standard of care for their patients. We welcome OBGYN specialists, allied health, nurses, trainee doctors, residents, and budding medical students to this congress as there is a wide repertoire of subjects and meaningful discussions tailored for each interest. The congress aims to allow participants to present, interact and exchange knowledge on a virtual platform, so that we are "Transforming Women's Health" for better prediction, prevention and treatment of women's health problems across the globe.

Hereby, I would like to take this opportunity to thank the organizing committee for their tireless efforts and dedication to bring this meeting to successful fruition as well as our sponsors for their generous support in this event.

We look forward to meeting all of you virtually during the Congress in August 2021 for a stimulating and enriching conference. Thank you for your participation and stay safe!
