Dear Colleagues,

The traditional **Ultrasonography Congress of Maternal Fetal Medicine and Perinatology Society of Türkiye** will be held between **October 25-29, 2023** at Hilton Bakırköy Hotel in Istanbul, Türkiye.

The most up-to-date information about obstetric ultrasonography will be discussed interactively and the clues and pitfalls leading to diagnosis will be discussed in this four days meeting. There will be the opportunity as always to benefit from the experiences of our colleagues in our country and other countries.

All systems will be discussed under the following headings and discussions will be made on case reports as much as possible during the congress. Therefore, we would like to invite our colleagues to share their experiences at the congress.

- Basic and detailed obstetric ultrasound
- Three-dimensional (3D) and four-dimensional (4D) ultrasound
- Fetal anomalies: Fetal central nervous system, heart, thorax, gastrointestinal system, urinary system, skeletal system...
- Maternal and Fetal Doppler
- Fetal growth and well-being
- Preterm birth, premature rupture of membranes
- Hypertensive diseases in pregnancy
- Placenta previa and placental adherence anomalies
- Amniotic fluid abnormalities
- Multiple pregnancies and their problems
- Prenatal diagnosis and screening tests, new technologies and developments in cfDNA
- Fetal treatments
- Invasive interventions
- Ultrasonography in the delivery room
- Evaluation of uterine and adnexal pathologies
- Pregnancy losses
- Maternal complications
- Fetal MRI

All these topics will be enriched with oral and poster presentations that our young colleagues will have the opportunity to present in the main hall. In addition, practical issues will be discussed with hands on training.

We would like to inform you that, Obstetricians Gynecologists, Perinatology Specialists and colleagues from other related branches will have the chance to exchange information and meet with industry representatives to see the latest innovations in prenatal diagnosis methods, genetics and ultrasonography technology.

We would like to invite you to this scientific feast, which we sincerely believe will be beneficial for every participants.

On behalf of the Maternal Fetal Medicine and Perinatology Society of Türkiye,

**Prof. Ahmet GÜL**  
Congress Co-chair

**Prof. Recep HAS**  
Congress Co-chair
