ADVANCED UNIVERSITY CERTIFICATE IN

MATERNAL-FETAL MEDICINE

May 6 - June 6, 2024

- Recorded lectures and live interactive masterclasses
- Top expert faculty
- Schedule compatible with Asia, Europe & Middle East time zone
- Duration 5 weeks: 9.5 hours/week
- Special prices for FMB Alumni

REGISTRATION OPEN:

 medicinafetalbarcelona.org/intensive-course-advance

General information

In this course, the clinical and teaching experience of internationally renowned specialists is offered, presented and synthesized in a way that allows attendees to intensively acquire the necessary knowledge to integrate the latest scientific developments and updated protocols in maternal-fetal medicine into their clinical practice.

Presentation

The constant update of scientific information in maternal-fetal medicine and the growing technological developments progressively increase the complexity of the knowledge required for managing pregnancy complications. Learning how to integrate all these scientific novelties realistically and accurately is one of the challenges for specialists with an interest or advanced practice in maternal-fetal medicine.

Objective

Upon completion of the course, attendees will have updated criteria and algorithms for the clinical diagnosis and management of the most relevant maternal-fetal pathologies.

Target

This program is designed for gynecologists and obstetricians seeking to efficiently update their comprehensive knowledge of the most relevant maternal-fetal pathologies. Attendees will acquire robust decision-making frameworks based on the best available evidence and the expertise of international experts in each field.

Course certificate

At the conclusion of each module, there is a multiple-choice test. Completion of this assessment (minimum of 70% correct responses) is necessary to obtain the final course certificate from Fetal Medicine Barcelona. Students will have three opportunities to pass.

DATES

From May 6th to June 6th, 2024.

SCHEDULE

Streaming classes are scheduled on Mondays and Thursdays from 12:00 PM (GMT+1) to 2:00 PM (GMT+1)*. Online classes will be conducted by the student at their own pace through the Fetal Medicine Barcelona virtual campus. *Streaming classes schedule subject to change.

FETAL i+D ACADEMIC DIRECTION AND SUPERVISION

Eduard Gratacós and Francesc Figueras.

COURSE ACCREDITED BY

Continuing Education Institute-IL3 at the University of Barcelona & Fetal Medicine Barcelona. The participants can also obtain a diploma awarded by the Continuing Education Institute-IL3 at the University of Barcelona: "Advanced University Certificate in Maternal-Fetal Medicine".

Academic structure

The course is structured into 10 modules, addressing the most relevant maternal-fetal pathologies. Each module includes two components, consisting of a self-paced online classes and streaming sessions.

ONLINE

- Access to online classes will be through the virtual campus of Fetal i+D Education Barcelona.
- The classes are taught by experts in each field, providing schematic updates on current knowledge and offering clear diagnostic algorithms and decision-making processes based on the best available evidence.
- The classes will be available on the virtual campus 15 days before the start of the course. It is recommended for the participants to have reviewed the classes for each module before the streaming session for better interaction.

STREAMING

- An 1-hour real-tasking session in which demonstrations (ultrasound exams, surgical procedures or management of complications) will be performed, or clinical cases will be presented. Active participation from students will contribute to the reinforcement of acquired knowledge.
- An 1.5-hour open discussion session where participants can interact with the teachers and steer the discussion toward the most relevant aspects.
- Each session will conclude with a summary of the key take-home points.

Both online classes and streaming sessions will be available on the virtual campus for one year (until April 6th, 2025), allowing students to view them unrestrictedly. Additionally, PDF presentations can be downloaded.
