

ORGANIZED BY

IN COLLABORATION WITH THE

Heartbeats Beyond Borders: International Fetal Heart Workshop

 11-12th January 2025

 8:00 AM to 5:00 PM

 Auditorium UPM, HSAAS

 Speakers

Dr. Pracshant Acharya
Renowned expert in Fetal Medicine

Dr. B. S Ramamurthy
Specialist in Fetal Neuroimaging

Limited to
50
participants
only!

The course is tailored for OBGYN specialist, MFM trainees, paediatric cardiologist and trainees.

Register by scanning/
clicking below.

Once you have registered, pay the amount due and provide a copy of your proof of remittance to drbavanaidu@gmail.com

Congenital heart disease (CHD) is the most common congenital malformation and can lead to significant adverse outcomes. The incidence of CHD is about 8-10 per 1,000 live births. In Malaysia, with a birth rate of approximately 501,945 per year, this results in 4,000-5,000 children born with CHD annually, including an estimated 1,500 cases of critical CHD. Alarmingly, 20-30% of these critical cases are diagnosed late, accounting for 40% of deaths from congenital anomalies.

Advancements in ultrasound technology over the past 3-4 decades have notably improved prenatal detection rates of CHD. Early detection can significantly influence outcomes and has a direct impact on:

1. Pregnancy and childbirth management
2. Decisions regarding voluntary termination of pregnancy
3. Opportunities for fetal intervention

DAY 1 Saturday, 11/1/2025

Time	Topic	Speaker(s)
0800 AM – 0830 AM	Registration	
0830 AM – 0845 AM	Welcome Speech & Opening Ceremony	
0845 AM – 1015 AM	Heart Geometry: Decoding the Four Chambers and Situs	Dr BS Ramamurthy
1015 AM – 1145 AM	Pathways of Life: Exploring Fetal Outflow Tracts and Venous System	Dr Prashant Acharya
1145 AM – 1245 PM	Live Demo	
1245 PM – 1345 PM	Lunch break	
1345 PM – 1515 PM	Cardiac Anomalies Unveiled: Interpreting Abnormal 4-Chamber Views	Dr BS Ramamurthy
1515 PM – 1630 PM	Flow Disruptions: Detecting Abnormalities in Outflow Tract Assessment	Dr Prashant Acharya
1630 PM – 1830 PM	From Theory to Practice: Hands-On	

DAY 2 Sunday, 12/1/2025

Time	Topic	Speaker(s)
0800 AM – 0830 AM	Conquering the Conundrum: Overriding Aorta and the Tetralogy of Fallot Spectrum	Dr Prashant Acharya
0830 AM – 0900 AM	Arterial Shifts: Unraveling the Spectrum of Transposition (TGA)	Dr BS Ramamurthy
0900 AM – 0930 AM	Double Pathways: Navigating the Spectrum of DORV	Dr BS Ramamurthy
0930 AM – 1015 AM	Situs Chaos: Exploring the Challenges of Heterotaxy Syndrome"	Dr Prashant Acharya
1015 AM – 1115 AM	Live Demo	
1115 AM – 1215 PM	When it Skips a beat!: Insights of Fetal Arrhythmias	Dr BS Ramamurthy
1215 PM – 1300 PM	First Glimpse: Pioneering Cardiac Evaluation in the First Trimester	Dr Prashant Acharya
1300 PM – 1400 PM	Lunch Break	
1400 PM – 1430 PM	Dual Dilemmas: Navigating Differential Diagnoses in Parallel Outflow Tracts	Dr BS Ramamurthy
1430 PM – 1500 PM	Blueprints of the Heart: Exploring the Genetic Foundations of Cardiac Disease	Dr Prashant Acharya
1500 PM – 1600 PM	3D in Motion: Mastering STIC for Fetal Echocardiography	Dr Prashant Acharya
1600 PM – 1800 PM	From Theory to Practice: Hands-On	

We encourage you to participate in our workshop focused on prenatal screening, a vital strategy for enhancing the detection of critical CHD globally. Effective prenatal diagnosis can decrease morbidity and mortality, leading to improved perioperative outcomes for infants with critical CHD.

Join us in this essential effort to advance prenatal screening and ensure better outcomes for children with congenital heart conditions.

Ticket Prices

Early Bird

RM600/participant and
USD 175 for international delegates
(before 15/12/2024)

Regular

RM700/participant and
USD 200 for international delegates
(after 15/12/2024)
