ADVISOR
6TH MFM CONFERENCE 2025

Dear Colleagues,

Welcome to the 6th National Maternal Fetal Medicine Conference 2025! The Maternal-Fetal Medicine Unit of Hospital Tengku Ampuan Afzan, Kuantan, is delighted to invite you to participate actively in this three-day conference from February 21st to 23rd, 2025.

Since 2015, this biennial conference has served as a premier platform, themed “From Strategy to Action” for discussing and updating knowledge on maternal and fetal health. It also fosters networking across specialties, recognizing that while experts best manage specific conditions, Maternal-Fetal Medicine focuses on how physiological changes in pregnancy contribute to maternal and fetal well-being. Our program addresses comprehensive patient care from pre-conception through the pregnancy journey.

The organizing committee has curated a dynamic lineup, including expert speakers, current topics, and interactive sessions. Over the course of three days, more than 25 presentations will delve into issues surrounding maternal and fetal conditions, covering advancements in diagnostics, interventions, management, and postpartum care.

Join us in our mission: Together we care, from strategy to action!

FROM STRATEGY TO ACTION

Welcome notes

**DR NORHASLIZA BINTI
AHMAD FAUZI**
CHAIRPERSON
6TH MFM CONFERENCE 2025

Dear All,

On behalf of the organizing committee, I am pleased to welcome all participants and delegates to the 6th National Maternal Fetal Conference, hosted by the Maternal Fetal Medicine Unit at AC Hotel by Marriot, Kuantan.

This conference is dedicated to optimizing care for pregnant women with complex medical conditions and their growing fetuses, utilizing the latest evidence, expert opinions from multidisciplinary teams, and shared experiences to achieve the best outcomes for both mother and child.

In response to the rise in medicolegal cases, we have prepared a symposium on clinical governance to enhance your knowledge. Confidential Enquiries into Maternal Death (CEMD) data reveal that the leading cause of maternal mortality remains within the category of women with pre-existing medical conditions.

Our commitment is to educate healthcare professionals on the management of these patients, from pre-conception assessment through postpartum care.

Our goal is to empower healthcare workers to confidently manage pregnant women with medical disorders and to address the impact of pregnancy on pre-existing conditions to ensure good outcome for both mother and baby. We look forward to an exceptional meeting with esteemed experts and valuable insights on managing maternal medical and surgical disorders.

Join us from February 21st to 23rd, 2025. I look forward to seeing you at the AC Hotel by Marriott, Kuantan!
