

## OGSM EXPERTS WEBINAR SERIES

### ENDOMETRIAL ABLATION- WHEN & WHY?

Saturday 12<sup>th</sup> December 2020; 1600hrs – 1740hrs

Management of AUB continues to be a challenge as more women prefer an alternative to surgery.

Endometrial ablation therapy bridges the gap between medical treatment and surgery with good long term results. We aim to re-explore this treatment modality in this webinar to debunk myths, explore new possibilities and perhaps, consider ablation as an option for our patients.

#### PROGRAMME

**1600** AUB Treatment and Ablation  
– The Malaysian story thus far

**1620** Endometrial Ablation  
– When and Why

**1700** Endometrial Ablation
